

**THE ABSOLUTE PHYSICAL REALITY OF THE SUN AND THE COSMOS
AS A WHOLE CAN BE TOTALLY REVEALED BY VERIFYING
SHRAIRFUSION MODEL**

(An open letter to dissident scientists, critics of mainstream physics theories and all honest and open-minded scientists)

Dear dedicated scientists,

Our star is misunderstood and the current standard solar model-which I prefer to call standard solar dogma - is not even wrong. Thermonuclear reactions are lab-induced quasi-nuclear fusion reactions that take place in the imaginary Big Bang Universe and in the minds of theoretical physicists not in the Sun or anywhere else in the Unified Magnetic-Helical Universe.

However, the mother of all empirical truths about our star can be shown beyond doubt by experimentally verifying SHRAIRFUSION Model. This model can also explain all phenomena that are considered mysteries and puzzles in the current standard solar dogma. Besides that, the proposed model is the theoretical foundation for realizing the dream of unlimited clean energy source. Thermonuclear reactions are quasi nuclear fusion reactions that can never be sustained to produce the desired fusion power, no matter what type of reactor will be used.

SHRAIRFUSION Model asserts that the true nuclear fusion process which takes place in the Sun can easily be induced or demonstrated with a very small reactor configuration- laboratory scale reactor- that costs a few thousand dollars. But, building a commercial fusion reactor based on SHRAIRFUSION Model will cost far more than a few thousand dollars.

Sadly, trillions of dollars and eighty years of research with different fusion devices and reactors are still not enough to convince the narrow-minded and the self-deluded scientists-who are the authority of course- that the problem is with their theory. Definitely, the so-called H-bomb has contributed enormously to the tragedy

of thermonuclear fusion. The so-called H-bomb is one of greatest scientific deceptions of the 20th century. Make no doubt about it, thermonuclear reaction does not take place in the Sun and does not take place in the H-bomb. I salute the outstanding Indian nuclear expert and former DRDO scientist K. Santhanam for exposing the truth about the H-bomb. I have stated previously that he deserves the highest prize for being honest about this important issue that cost humanity and scientific progress dearly.

Dear dedicated scientists,

There is nothing that can restore cosmology, astrophysics and physics in general to their right places-after one hundred and twenty years of endless mathematical fiction theories- other than generating nuclear fusion power based on the physical reality of our star. The physics establishment and all current nuclear fusion research centers and institutes around the world will be totally defenseless when the mother of all the empirical truths about our star will be revealed. The theoreticians who inflicted an infinite damage on the progress of physics will raise the white flag, since all current theoretical arguments about the Sun will be meaningless afterwards. More importantly, the Big Bang Universe and all theories associated with it will cease to exist. On the other hand, the financial implications will be of course enormous on the private sectors, especially the energy sector, but humanity will be victorious on all fronts and the Universal Truth of the Magnetic Structured of Matter will be entirely revealed and understood.
